Carolina Surf School Staff Photographer Job Description

Job Description:

The staff photographer will be responsible for recording the exciting experiences of clients at Surf Camp in a non-intrusive and primarily photojournalistic manner. The photographer should feel comfortable photographing subjects in a variety of technically challenging lighting conditions within small moments of time in order to provide Surf Camp Inc. with the best product representing the services that are provided. Photos will be taken throughout the day and should fully represent the experience of clients while they enjoy themselves at Surf Camp. At the end of each photo shoot, typically spread out among several days, the photos must be turned into Surf Camp Inc. offices for review and immediate distribution.

Job Requirements:

The ideal photographer will use their technical proficiency and artistic eye to document the water escapades and on-land adventures of Surf Camp clients. This individual must be very detail oriented and have the ability to photograph persons equally within the assigned groups. The photographer is expected to have, at the minimum, 300 sellable photos by the completion of the overnight groups. All photos are to be resized to; be posted in a gallery on Facebook; fit on a 700mb compact disc (approximately 1.1 megabytes per picture) and subsequently burned onto a compact disc under deadline. The compact disc passed on at the completion of the week should be in a final and professional form, neatly labeled both externally and internally.

Applicant should be experienced in Adobe Photo Editing Software, be able to efficiently edit, export, and organize.

Applicant will need reliable transportation and mobile phone.

Equipment Requirements:

- ❖ Digital SLR Camera capable of shooting RAW format
- ❖ Short and fast wide angle lens for lifestyle photos and at least a 200mm telephoto lens for capturing action surfing shots from the beach
- ❖ Computer capable of working with high-resolution digital images and software with the ability to process and categorize large amounts of photos: Adobe Photoshop, Adobe Bridge, Adobe Lightroom.
